Why eTrans ERP?

In this emerging world of new business concepts and technology, a business cannot rely on different software that does not facilitate interaction. Customizations for these individualized software as per changing requirements of your business is very difficult which will directly affect your business activities. Although these individual software systems serve their respective purpose, using such incompatible systems negatively affect manageability and productivity of your business.

- eTrans ERP can considerably boost quality, productivity and overall performance of a business. By keeping a company's internal business process running smoothly
- eTrans ERP saves valuable time and cost effective way.
- eTrans ERP can lead to better outputs that benefit the company, such as customer service and manufacturing.
- eTrans ERP facilitates top level management, offering critical decision making information. This decision support enables top management make effective choices that greatly enhance the business.

Complete Enterprise Solutions

Prayukti Software Technologies, based in Bangalore is one of the leading ERP service providers. We have seasoned professionals qualified in IT and Management domains and are ready to provide you complete ERP Solutions for your business needs with eTrans ERP, fully customizable Enterprise Resource Planning (ERP) Software. It is an integrated system that operates in real time without depending on periodic updates.

eTrans ERP provides built in real-time view of key business functions, using either Microsoft Access or SQL database management system.

Using our eTrans ERP system, you can track business resources such as cash, raw materials, production capacity and the essential status of business obligations like orders, purchase orders, and payroll. This will help companies to improve quality and efficiency of a business. By keeping a company's internal business process running smoothly, eTrans ERP can lead to better outputs that benefit the company, such as customer service and manufacturing.

eTrans ERP facilitates information flow between all business functions, and manages connections to outside stakeholders effectively at low cost.
